

Task:

Download **THREE** of the following AQA GCSE Computer Science course works and code an answer to it in python (use the following link if you don't have python <https://www.python.org/download/releases/3.3.0/>).

Google Drive with files:

https://drive.google.com/drive/folders/0B_ubOspJ22g-MmltS3FycWppZDQ?usp=sharing

Do not worry about the planning, testing and evaluation aspects. Just code a working solution and annotate the code appropriately. These were all previous GCSE coding tasks, so try a few of them and see if you can get the programming elements to work as a means of checking your skill and revising it in some cases.
